Answer Sheet

- Q1) **Which side of = does the data binding source should be located in Angular**

    1. ✖ 👤 left

    2. ✔ right

    3. ✖ Depends upon the element to bind

    4. ✖ Depends upon the directive properties

- Q2) **What value should be given to start parameter, to return the item at start index from the end and all items after in the list or string expression, in Slicepipe of Angular**

    1. ✖ 👤 positive integer

    2. ✔ negative integer

    3. ✖ TRUE

    4. ✖ Depends upon the text

- Q3) **What data type is given by JsonPipe in Angular**

    1. ✖ Structure

    2. ✖ Stream

    3. ✔ String

    4. ✖ 👤 Array

- Q4) **Identify the Angular attribute directive, which is used for two-way data binding to an HTML form element**

    1. ✖ NgClass

    2. ✖ NgStyle

Submit Test   Get Govt. Certified

       4. ✖ NgHTML

- Q5) **Which Angular CSS class has the value of true, if the control's value has changed**

- Q15) **Select the syntax of data binding in Angular of one-way - from view target to data source**

    1. ✖ 👤 [target]="expression"

    2. ✖ [(target)]="expression"

    3. ✔ (target)="statement"

    4. ✖ None of these

- Q16)

    Select the correct syntax of an NgIf directive bound to a isActive condition expression in Angular

    1. ✖

       <hero-detail isActive="ngIf"></hero-detail>

    2. ✖

       <hero-detail *isActive="ngIf"></hero-detail>

    3. ✔ 👤

        <hero-detail *ngIf="isActive"></hero-detail>

    4. ✖

       <hero-detail ngIf="isActive"></hero-detail>

    Explanation:-

    NgIf
    A structural directive that conditionally includes a template based on the value of an expression coerced to Boolean. When the expression evaluates to true, Angular renders the template provided in a then clause, and when false or null, Angular renders the template provided in an optional else clause. The default template for the else clause is blank.

- Q17) **How is source of a data binding enclosed, in Angular**

    1. ✖ inside the binding punctuation [ ]

    2. ✖ inside the binding punctuation ( )

    3. ✖ inside the binding punctuation [( )]

Submit Test   Get Govt. Certified

- Q18) **When to omit the brackets during one-time string initialization in Angular template**

    1. ✖ The target property accepts a string value.

...nat you can bake into the template.

...valid predefined date format, accepted by DatePipe in Angular

    1. ✔ long

...eline for expressions in Angular template

...uickly

- Q21) **Which Angular CSS class has the value of false, if the control has been visited**

    1. ✖ ng-touched

    2. ✖ ng-dirty

    3. ✔ 👤 ng-untouched

    4. ✖ ng-valid

- Q22) **Select the correct syntax for Angular template which binds property value to the result of expression firstName**

    1. ✖

       <input [{value}]="firstName">

    2. ✖

       <input {value}="firstName">

    3. ✔ 👤

       <input [value]="firstName">

    4. ✖

       <input (value)="firstName">

- Q23) **What is the valid syntax for Angular template which binds the presence of the CSS class extra-sparkle on the element to the truthiness of the expression isDelightful**

    1. ✖

       <div [{class.extra-sparkle}]="isDelightful">

    2. ✔ 👤

       <div [class.extra-sparkle]="isDelightful">

    3. ✖

       <div (class.extra-sparkle)="isDelightful">

    4. ✖

       <div {class.extra-sparkle}="isDelightful">

Angular template which binds style property width to the result of expression mySize in pixels. Units are optional.

1. ✖

   <div (style.width.px)="mySize">

2. ✖

   <div {style.width.px}="mySize">

3. ✔ 👤

   <div [style.width.px]="mySize">

4. ✖

   <div {[style.width.px]}="mySize">

Explanation:-

<div [style.width.px]="mySize">

Binds style property width to the result of expression mySize in pixels.

- Q27) **What data type is returned by UpperCasePipe in Angular**

   1. ✖ Stream

   2. ✖ Structure

   3. ✖ Array

   4. ✔ 👤 String

Explanation:-

UpperCasePipe

Transforms text to all upper case.

    1. ✖ 👤 [(target)]="expression"

    2. ✖ None of these

    3. ✔ {{expression}}

Submit Test   Get Govt. Certified

- Q41) **What is the language of the Angular template**

    1. ✖ Javascript

adding an ngClass property binding to currentClasses in Angular

ss">This div is initially saveable, unchanged, and special</div>

s">This div is initially saveable, unchanged, and special</div>

es">This div is initially saveable, unchanged, and special</div>

es">This div is initially saveable, unchanged, and special</div>

The NgClass directive will feel very similar to what ngClass used to do in Angular 1. When using an object literal, the keys are the classes which are added to the element if the value of the key evaluates to true.

- Q43) **What data type is returned by LowerCasePipe in Angular**

    1. ✔ 👤 String

    2. ✖ Array

    3. ✖ Structure

    4. ✖ Stream

    Explanation:-

    ]

- Q44) **Which of the following JavaScript expression should not be used in a template expression of Angular**

    1. ✖ expression with increment or decrement operators

    2. ✖ chaining expressions with ;

    3. ✖ assignment expression

    4. ✔ 👤 All of these

- Q45) **What is the effect of applying an NgIf directive to an web element in Angular**

    1. ✔ 👤 Angular removes the element and its descendents from the DOM

    2. ✖ Angular may hide or remove the element and its descendents from the DOM, depending upon number of descendents

    3. ✖ Angular hides the element and its descendents from the DOM

    4. ✖ None of these

- Q46) **Which operator is not supported by template expression in Angular**

    1. ✖ +=

    2. ✖ 👤 =

    3. ✔ &
